

LETTER OF TESTIMONIAL FOR NEWCASTLE ELECTRIC

Being a general contractor for 23 years has given me much opportunity to deal with many sub-contractors. For over 17 years I built retail stores across the country. As a result the amount of sub-contractors hired is several thousand strong. If nothing else this experience has given me a pretty good sense of what a qualified Electrical sub-contractor looks like.

Newcastle Electric has been my electrical contractor from the beginning of my current project until now, two years later. Geoff and his crew have given me and this project some of the best service I have experienced as a general contractor. Their prices are fair, the quality of work is excellent, attention to detail is among the best and service ethic has been such that I have no complaints.

Newcastle would get a referral from me without hesitation.
